2006
JGN II International Forum for Research Collaborations
in Fukui

Toward the info-communication society beyond time and space

Environments of our lives change day by day with evolving high speed information and communication technologies. Authorities and leaders in relevant fields are invited to give memorial keynote speeches and discuss expected network technologies and applications for the quality-of-life improvement and local industries development, above all, from the customer points of view. For this forum, two venues, Fukui Convention Center in Japan and NECTEC (R&D Labs) in Thailand are linked over NICT's Japan Giga-bit Network for R&D, so called JGN-II.

<Program>
Opening Address   by Mr.Hiroshi Asami, Executive Managing Director, Hokuriku Bureau of
                   Telecommunications, Ministry of Internal Affairs and Communications of Japan
